

Comparative Course Pricing - public course schedules

Adaptive Frameworks endeavours to provide the most reasonably priced PRINCE2® courses within the constraints dictated by quality. Our pricing policy is one of 'no surprises' - you know what you are up for. In comparing prices, a check needs to be made for whether GST and the textbook are included, so that the comparison is fair. On Adaptive Frameworks courses, delegates are given the textbook as part of their project management toolkit and are taught how to reference it effectively during the course.

We believe we are the most reasonably priced provider given our record of achievement in delegate results, the quality of our materials and the extensive real world project experience of all our trainers. We share the following price research from websites with you. Prices are based on the standard pricing and do not include specials such as the Hot Deals from Adaptive Frameworks. Standard courses tend to be over 4 days for Foundation and 1-2 for Practitioner. Where there is a variance from this it is noted in the last column

Last price check completed: 9 April 2009

Provider	Advertised Foundation	Advertised Practitioner	Includes Book	Includes GST	Applies with apples Price Foundation	Applies with apples Price Practitioner	Comment
Adaptive Frameworks	\$1,865	\$2,695	✓	✓	\$1,865	\$2,695
